

# China Trade Mission 2016 - Beijing/Chengdu

(Clean Energy/U.S. Collaboration on Smart Cities in China)

June 6th - 12th, 2016

## Follow-On to “China Clean Technology - Business Development Mission” from April 2015:

**Expand Your Business Opportunity in China!**

### About the Mission

This trade mission from **June 6- June 12th** will be a follow-on Trade Mission by the private sector to the April, 2015 Trade Mission led by the U.S. Department of Energy and U.S. Department of Commerce (designated as official Presidential Trade Mission), which focused on assisting in identifying potential partners and strategies for U.S. companies in target clean energy sectors. The companies involved have identified specific smart city/clean energy projects that have great potential for U.S. involvement and will be leading visits to those project sites located in Chengdu (Sichuan Province) and participating in the **2nd Annual U.S./China Climate Leaders Summit** in Beijing featuring top leaders from the U.S. and China (Last year’s event featured keynotes from Vice President Joe Biden). Don’t miss this unique opportunity!

### Mission Goals

This trade mission will continue to build on U.S. commitment to sustaining economic partnerships in China and supporting the business development goals of U.S. firms by exploring potential collaboration and demonstration projects, and to create a foundation for future business in China for U.S. companies.

### Industry Focus

- ◆ Clean/Green Energy
- ◆ Smart City Technologies
